

NexusGrid

Unique and versatile with a stunning appearance that provides a seamless blend with regular product. Ideal for domestic, commercial and industrial applications

Features

No visible plastic around switches

Easy to install with cantilever module to frame installation

Interchangeable rockers provide flexibility

Clearly printed terminal markings with captive screws

A wide selection of module and plate options

Range Content

General Assembly – Step 1

Fit and secure appropriate mounting box and frame
Please see Note 1 – for additional assembly instructions required that are relevant to the plate type being installed -

- Pull cabling through frame and strip insulation accordingly.
- Ensure an earth connection between frame and box (if required).
- Systematically terminate cables into each module.

General Assembly – Step 2

To fit module to frame -

- Locate groove in lower edge of module over lower edge of aperture in frame and pivot upwards locating the pegs on the module into holes in frame and clip into place.
- It is recommended to decorate wall before fixing front plate.
- Attach front-plate using fixing screws provided or push for secure clip-on. For Screwless Front-plates please see Note 2 for additional assembly instructions.

Replacement /Interchangeable Rockers

Replacement rockers

- Switch modules are supplied with plain rockers, however a selection of pre-printed rockers are available.

To replace:

- Remove existing rocker by inserting screwdriver under rocker cap and lifting.
- Position replacement cap into aperture and clip into place ensuring text is correctly aligned in relationship to top of module.

Note 1

For **Nexus White Moulded, Metal and Brass** - Remove the 2 plastic spacers and discard.
For Metal Clad Grid - Bend the 4 lugs down where indicated by the V notches and ensure plastic spacers are fitted.

The position of the frame in relationship with the wall can be adjusted by the two captive fixing screws.

For Decorative Flat-plate - Before fixing the frame to the wall ensure that the gasket supplied is correctly positioned between the frame and the wall.

Note 2

Decorative Flat-plate - When fitting ONE or THREE modules to the screwless Flat plate grid frame - the blanking strips supplied must be fitted either side of the module(s) - to prevent access to the wiring.

Frontplate - Should be fitted with the removal notch located over the angled face of the gasket in the lower right hand corner.
